Fall 2018 – Spring 2019

This concentration within the MUP program is intended to provide a solid professional and academic preparation in international planning. The concentration responds to three global concerns. The first is the increasing prominence of urbanization as a major political, economic and social force in world affairs. As of 2010, for the first time in our species’ history, more than half of the world’s population now lives in cities. This fundamental change in the pattern of global human settlement raises unprecedented challenges for the planning, design and management of cities and their hinterlands. The second motivating concern is the rapid growth of cities in the developing world, where most growth in the planet’s urban population is now taking place. Finally, the concentration reflects the recognition that planners can draw profound lessons from a comparative perspective on urban phenomena, drawing across experiences in different countries and diverse urban environments.

Within the concentration, students can focus broadly on international planning or concentrate on a number of subthemes that speak to pressing problems related to different developmental conditions. The latter topics might include informality, poverty, service scarcities (especially in transportation, housing, water, and health services), social exclusion, and governance, including the potential for participatory planning. Students are encouraged to focus their interests on a single country in a particular region (such as Latin America, South Asia, the Middle East, or Africa, to name just a few). To successfully satisfy the concentration requirements, students must complete 12 units from the list of preapproved courses provided below or from other courses that have been selected by the student and approved by the concentration advisor. Students intending to undertake the concentration in international planning should begin to map out courses early in their program to be sure that they are able to take advantage of courses offered in only one term or in alternate years.

As Harvard and other local universities offer a wide variety of courses relevant to international planning, the list below is not exhaustive. If students would like to include alternative courses to satisfy the 12 unit concentration requirement, they should speak early on with Michael Hooper or Diane Davis to ensure that the courses are suitable. Participation in some of the courses listed below may require permission from their instructors, and it is the student’s responsibility to contact such instructors to ascertain whether admission is possible. For course offerings in other schools at Harvard or at other universities, it is recommended that students approach the instructor early to ensure it is possible to take the course. Students are advised to review the course pages of the respective schools and departments to be sure that no changes to listings have taken place.

Please note that course offerings often change, and new courses may be offered while these recommended courses may not be offered each year. This memo is subject to change depending on the availability of courses. Other courses may be approved with the permission of one of the Concentration Advisors.
The following courses are recommended to those interested in the concentration. They are introductory level courses that give a good overview of the topics and subject matter covered in more depth by other courses in the concentration:
