Jungyoon Kim is a practicing landscape architect and educator, registered in the Netherlands and in Massachusetts, USA. She founded PARKKIM with Yoonjin Park in Rotterdam (2004), and relocated to Seoul, Korea (2006). Since its inception, PARKKIM has completed a wide variety of projects that range in scale and nature, including high-profile corporate landscapes and civic venues. Notable completed projects include Seoul Museum of Craft Art (2021), Hyundai Motor Group Global Partnership Center and University Gyeongju Campus (2020), the Plaza of Gyeonggi Provincial North Office (2018), CJ Blossom Park (2015), and Yanghwa Riverfront (2011). Their ongoing projects include Suseongmot Lake Floating Stage in Daegu, Korea, for which PARKKIM won the international invited competition in 2024 and is to be completed in 2026.

In 2025, PARKKIM PLLC opened in Massachusetts, with the goal of expanding its practice beyond the Korean peninsula.

She published the book 'Alternative Nature' (2015), co-authored with Park, which is a compilation of articles written by the two principals since 2001. The term 'alternative nature' was first presented in their essay 'Gangnam Alternative Nature: the experience of nature without parks', featured in the book 'Asian Alterity (ed. William Lim, Singapore: 2007)', rethinking the concept of 'natural' within the context of contemporary East Asian urbanism.

Upon her appointment at Harvard GSD, Kim has expanded PARKKIM's design research into seminar courses and option studios. "Lost and Alternative Nature: Vertical Mapping of Urban Subterrains for Climate Change Mitigation" examines urbanization's impact on both above and underground city environments. Kim's ongoing seminar on contemporary landscape practices in Asia highlights under-discussed methodologies reflective of the region's rich natural and cultural heritage. Her series of option studios has explored urban and rural landscapes worldwide—cities including Seoul, Antwerp, Boston, and Kurobe—demonstrating that landscape architecture can be an agency to enhance the quality of life of citizens in the era of climate change.

Jungyoon was selected as the 'Design Leader of Next Generation' (2007) awarded by the Korean Ministry of Commerce and appointed to 'Seoul Public Architect' (2011) by the Metropolitan Government Seoul. She received a Master of Landscape Architecture from the GSD and a Bachelor of Agriculture in Landscape Architecture from Seoul National University with distinction.
